4

InVideo.io

This software allows you to create an entire video from scripts and articles It provides templates, voiceovers, and a large library of visuals to match the text. You can use these videos on your website, FB page, blog, Instagram, email marketing, etc.

5

Elevenlabs.io

It converts text input into realistic voiceovers on your videos. Content creators like this software over others as the voices are more natural and able to capture emotions and intonation. This tool can also clone voice. With Eleven Labs, you do not need to use your own voice on the video, which is a plus for those who do not like to hear their voice.
